I have over 1+ year of experience as a frontend developer. I work with modern technologies such as ReactJS, Next.js, Tailwind CSS, and TypeScript. I strive to create web applications that are user-friendly, fast, and modern in design. I also possess the ability to work in a team and have experience working with technologies like SEO, responsive design, Firebase, and Clerk. I am continuously strengthening my skills through my portfolio and real-world projects.

PROJECTS

Portfolio
Live Link | Github Link

A portfolio website built using Next.js, TypeScript, Tailwind CSS, and Shadcn UI technologies. It features a fully responsive design, animations, optimized images in WebP format, and is enriched with SEO fundamentals. Achieved 100% scores in all categories on the Lighthouse test. The design and functionality were developed based on an individual approach.

EDUCATION

Codemy
2023-05-08 - 2024-05-07

Junior - Frontend Developer

At Codemy training center, I studied the fundamental areas of frontend development. I gained both theoretical and practical knowledge in working with technologies such as HTML, CSS, JavaScript, ReactJS, Styled-components, Bootstrap, and Tailwind CSS. I completed solid exercises on each topic, developing skills in creating user interfaces, building components, and styling pages using various methods.

Sammi
2023-06-01 - Present

Junior - Frontend Developer

Through the Sammi platform, I thoroughly learned the fundamentals of HTML, CSS, SASS, Tailwind CSS, and JavaScript. Using ReactJS, I gained experience with component-based architecture, working with state, props, and hooks through hands-on projects. I also acquired skills in version control using Git and GitHub, as well as writing clean and structured code.

Sammi Praktikum
2024-10-03 - 2024-12-10

Junior - Frontend Developer

During the Sammi practicum, I gained practical knowledge in working with Next.js, Firebase, Clerk, and SEO. I learned how to build a portfolio website, implement authentication, work with domains, deploy websites to Vercel, and use Google Search Console. Additionally, I deepened my understanding of JavaScript and ReactJS, and strengthened my ability to work independently in a real development environment.

SKILLS

Frontend: Html, SASS / CSS, JavaScript, TypeScript, Bootstrap, Tailwindcss, styled-components, React.js, Next.js, SEO, Git / Github, CMS

LANGUAGES

- Uzbek - Fluent
- English - Intermediate
